

Conversations.php

- All users
 - Your conversations will be displayed on the left side of the screen and are ordered by Active first, pending second, unread third, and denied last. Additionally, within each of these ordered groups they will be ordered by most recent first.
- Mentor
 - This will be where you review mentee requests in the form of messages.
 - For accepted conversations, there is an “End Mentorship” button that you can click at any time to end the mentor pairing with another user. Also, the text area and send message button are enabled for you to type and send messages to the selected mentee.
 - For pending conversations, there will be an Accept or Deny button in the message area. Should you click on the Accept button, a message area will be displayed in the top of the screen asking you to let the mentee know that you are ready to chat with them. If you click on the Deny button, a similar message area will be displayed that will ask you to explain to the mentee why you have changed your mind about the mentorship. For both cases, a send and cancel button will accompany the message area.
 - For unread conversations; an accept, pending, and deny button are available at the top of the screen. The accept and deny buttons function the same as they do for pending conversations, however the pending button will open a similar message box that has you send a message to the mentee explaining why you would like to chat with them further, but are unable to at this time.
 - For denied conversations, the text area and send button will be disabled, but you will be able to still report the user.
 - The name of the mentee is displayed at the top of the messages area.
- Mentee
 - This will be where you can talk to mentors that you have searched for and sent a mentorship request to.
 - For all chats you will be able to click on the mentors name after selecting a conversation to view their profile. Additionally you can click on the menu icon in the top right of the messages screen to report the user you have selected if they have violated the terms and conditions for the website.
 - For accepted conversations, there is an “End Mentorship” button that you can click at any time to end the mentor pairing with another user. Also, the text area and send message button are enabled for you to type and send messages to the selected mentor.
 - For pending conversations, a message is displayed informing you that the conversation is currently pending mentor availability and thus the typed message area is locked as well as the send button
 - For unviewed conversations, a message is displayed notifying you that it is pending mentor approval and the typed message area is locked as well as the send message button.
- For denied conversations, the typed message area is locked with a message notifying the user that the chat was denied by the mentor and the send button is locked.

ViewProfile.php

- This page is used for Mentees to view information about Mentors. They can see their email, biography, communication methods, expertise, skills, education, and job experience details. Additionally they can click the “Start Conversation” button in the top right corner which will open a pop up message area for the Mentee to send a request to the Mentor. If the Mentee already has a pending or open conversation with the Mentor, there is a message that tells the Mentee to go to the Conversations page to continue chatting.

AdminConsole.php

- This page is intended for the use of the Administrator to moderate accounts, accept new mentors, review reports, etc. This page offers five unique commands located on the left of the screen; Review Pending Mentors, Review Reported Users, Review Banned Users, Search for Mentor, Change Automated Email Credentials.
- The Review Pending Mentors drops down and displays any currently pending mentors, if no such mentors exist then there will be a display of ‘No Pending Mentors’.
 - If pending mentors are available, the list will be shown beneath the Review Pending Mentors tab and when a mentor is clicked on, the right side of the screen will populate with the profile of the mentor with an accept and deny button in the top right of the screen. Accepting the mentor will allow them to log in and begin mentoring students while denying the mentor will delete their account and notify the mentor that they have not been allowed in the program. Both will send an email to the mentor notifying them of the decision.
- The Review Reported Users drops down and displays any currently unreviewed reports. If no unreviewed reports exist, then the drop down menu displays “No Reported Users”.
 - Upon clicking on one of the reported users in the event that an unreviewed report exists, it will display the name of the reported user, the name of the user sending the report, the details of the report as well as a ban user button, and dismiss report button. Below this will be the conversation between the two users so that the administrator can search for any violation of the terms and conditions.
- The Review Banned Users drops down and shows a list of banned users if any exist. Same as previously, if none are found a message is displayed saying “No Banned Users”. Alternatively, if you click on a Banned User, it will show the users profile and have an unban button in the top right of the screen. This is likely to be used if the mentor calls Career Services and further explains the previous circumstances of their report.
- The Search for Mentor drops down with a search bar where the administrator may type in a key word to search the database for any mentors matching their query. Upon searching, any mentors that are found as a match will be displayed beneath the search bar and the admin can view their profiles. Alternatively, if no search results are found then a message will be displayed notifying the admin that no mentors were found under the given search constraints.
- The change automated email credentials button loads a screen on the right that allows the admin to enter a new email address and the password associated with that email address to change the email that is used to send out automated messages. Additionally, there is a test

automated credentials button below the form to allow the admin to check if the change was successful. If the change was successful, then the email they specified will be sent an automated message, otherwise no message will be found in the email.

Search.php

- This page can is only viewable by Mentees and is used to search for mentors you think will be able to assist you in this program! The top of the page has a search bar where you can type in key words that will search for mentors that match your parameter. The page is automatically populated with default mentors in the program, and when you click on a mentor you will be sent to their profile page to view more information about them.
